

# Parcel Builder®

parcel builder 4.0 service pack 1

---

## Parcel Builder-Administrator® Bug Fixes

- Randomly disconnects for concurrent license users
- Unable to open ODBC Data Source Administrator from PBA Configuration on some Windows XP machines.
- Adjusted condo linking.
- Added an on/off switch for writing tasks to the swap table (this only affects users who have an integrator license).
- Users were unable to unlink parcels from the map.

## Parcel Builder-MapEditor® Bug Fixes

- Tag Editor, Define Tag Topology, and Attribute Transfer Point to Polygon became disabled if a shapefile or cad layer were in the table of contents.

## Parcel Builder-MapPlotter® Bug Fixes

- Corrected the Export Pages and Quick Export commands.

## Parcel Builder-MapView® Bug Fixes

- MapViewer failed to launch if user only had ArcReader installed.
